GREYS PROWLA TRACE TUBE AND TOOL ROLL

SERIOUS pikers will appreciate the attention to detail found in the Greys Prowla range. Their Trace Tube and Tool Roll are both well thought out quality products.

The Trace Tube features a tough moulded plastic rig tidy, with a central chamber and lid for holding baiting needles, a flavour or two or pop-up accessories. Injection moulded, the retaining pins are strong and the black EVA foam takes the hooks on your trace with ease. The whole lot stores in a zipped top, fabric coated plastic outer.

The Tool Roll will store all six Prowla predator tools, individually. The long nosed pliers and extra long side cutters will fit in the two largest internal pockets, whilst there are other pockets for the crimping and split ring tools, and the Prowla 10 in. straight and curved forceps.

Once in situ the top retaining flap Velcros down, the whole lot then rolls up tidily.

Greys are raising the bar on pike accessories with products like these which are built to last. Visit www.greysfishing.com
